

# IEEE UEMCON Workshop

Windows: Raspberry Pi image setup and sanity check

**Phillip G. Bradford**

[phillip.bradford@uconn.edu](mailto:phillip.bradford@uconn.edu), [phillip.g.bradford@gmail.com](mailto:phillip.g.bradford@gmail.com)

# Objectives

Download and setup the Raspberry Pi images on Windows 10

Sanity check the Raspberry Pi images using qemu-system-arm

Look at the qemu-system-arm command

# Methods and tools

Create a **workshop** directory on your machine

In the workshop directory git clone <https://github.com/wonder-phil/RPi>

Download Raspberry Pi OS Lite IMG file from:

<https://www.raspberrypi.org/software/operating-systems/>

Convert the IMG file to a QCOW2 file

Boot the virtual Raspberry Pi using qemu-system-arm

# Websites

If you do not have git on your Windows 10 machine, then install it:

<https://github.com/git-guides/install-git>

Raspberry Pi OS IMG files:

<https://www.raspberrypi.org/software/operating-systems/>
